-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Upon a further review of the file and the prior art rejection, the allowability of claims 20-21 is withdrawn and prosecution of the case on its merits continues.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 20-21 are rejected under 35 U.S.C. 103(a) as being unpatentable over Sauces and Hallstrom taken together and as further evidenced by Kesharial for reasons of record used in rejecting claim 22 in the last office action.

Sauces discloses the preparation of tomato butter from raw tomatoes. The raw tomatoes are comminuted and then combined with butter. Cooking is described as an option in the preparation of the tomato. The claim appears to differ from Sauces in the recitation of the inclusion of the plant sterol. Where high cholesterol is a problem for many people, Hallstrom provides for an alternative to butter. Hallstrom teaches a butter substitute that contains phytosterols that is made according to the recipe shown at column 13, lines 18-24. At column 10, lines 58-62, the product is

formulated into a margarine product that was favorably compared with conventional margarine. Thus Hallstrom teaches the preparation of a butter substitute for the "do-it-yourself" cook. It would have been obvious to substitute the Hallstrom margarine for the butter in Sauces in order to provide for a lower cholesterol alternative tomato butter. It is appreciated that carotenoids are not mentioned in the references, but tomatoes have long been known as a rich source of carotenoids and Kesharlal is relied upon for evidence of this assertion at column 1, lines 12-15. Further it is appreciated that Sauce is not shown but the product could be used as a sauce by increasing the serving temperature of the tomato butter.
